The Varina Sen Sok St.1962 Sangkat Krang Thnong Khan Sen Sok

Sex: Male | Date of birth: 03-09-2006 | Nationality: Cambodian

SUMMARY

Cybersecurity student with a strong foundation in application security, penetration testing, and secure software development. Experienced with vulnerability assessment of web applications and APIs using industry-standard security tools and manual testing techniques. Proficient in C++, Java, Python, Linux, and scripting for security automation. Actively developing skills in reverse engineering, exploit analysis, and offensive security through hands-on labs and CTF challenges.

PROJECT EXPERIENCE

Auto-Offensive

Auto Offensive is a cyber security automation platform that streamlines security assessments by integrating reconnaissance, vulnerability scanning, analysis, and reporting into a unified workflow.

Key Contributions:

- Led a team of developers by coordinating tasks, monitoring progress, and ensuring timely project delivery.
- Implemented sandboxed tool execution using Docker and gVisor to enhance workload isolation and reduce host exposure.
- Built a metadata-driven architecture allowing security tools to be registered and managed dynamically.
- Developed real-time log streaming capabilities for execution monitoring and operational visibility.
- Designed and implemented a scan history management system to organize, track, and retrieve user security assessment results across multiple engagements.
- Configured CI/CD pipelines with Jenkins to streamline application delivery and deployment.
- Built frontend interfaces with Next.js and TypeScript and integrated backend APIs.
- Managed Linux server deployment and Nginx reverse proxy configuration.

CodeCompass

Developed a LeetCode-style coding practice platform designed to help students, beginners, and developers strengthen algorithmic thinking and problem-solving skills through structured coding challenges and automated evaluation.

Key Contributions:

- Led a team of developers by coordinating tasks, monitoring progress, and ensuring timely project delivery.
- Designed and implemented the backend architecture using Spring Boot, JPA, and PostgreSQL.
- Developed core features including coding problem management, problem categorization through tags and packages, code submission handling, user progress tracking, badges and achievements, and leaderboard systems.
- Designed relational database schemas and optimized data access using JPA.
- Collaborated with team members using Git for version control, code reviews, and integration workflows.
- Built frontend using Next.js and TypeScript for a dynamic and responsive user interface and the integration with APIs to handle dynamic data

Rean Data

A learning-focused platform designed for students interested in data analytics, offering curated content and exploratory resources.

Responsibilities:

- Team leader
- Integrated system frontend and backend together
- Designed user-friendly and responsive UI/UX
- Collect data & requirements
- Deployed and maintained the platform using Vercel

EDUCATION

Preah Kossomak Polytechnic Institute

2024 - 2026

Bachelor of Information Technology

- C++, Java, Arduino VB.NET Programming Language
- Database Management System (MySQL Server)
- Applied Statistics
- Computer Network
- Web Development in PHP

Institute of Science and Technology Advanced Development

2024-2026

Pre-University: July – August, 2024, Mon-Fri, 2 hours per day, 2 months

- Get familiar with C++ programming
- Understand the use of OOP in real application
- Create an awesome console application with C++
- Solving problem by coding with C++

Web Development Fundamental: November – March, 2024, Mon-Fri, 4 hours per day, 4 months

- **Java:** Fundamental Java and OOP concepts, Database Connectivity
- **Frontend:** HTML, CSS 3, Bootstrap 5, Tailwind CSS, UX and UI Design, JavaScript, React.js, Redux Toolkit
- **Database:** PostgreSQL, SQL Basic SQL
- **Git:** Version Control System, Collaboration, Solving Conflict

Web Full Stack Development: March – October, 2025, Mon-Fri, 4 hours per day, 6 months

- **Java:** Fundamental Java and OOP concepts, Database Connectivity
- **Frontend:** HTML, CSS 3, Tailwind CSS, UX and UI Design, JavaScript, TypeScript, Server Communication, Next.js, Redux Toolkit, Web security
- **Spring:** Spring Boot, JPA, Spring RESTful Web Service, Spring Security with Keycloak, Thymeleaf Template Engine, JWT
- **Database:** PostgreSQL, SQL(Basic SQL, Advanced SQL), Data Modelling
- **Git:** Version Control System, Collaboration, Solving Conflict
- **Deployment:** Linux fundamental, Basic Cloud Service Usage, Web Server Configuration (NGINX), Docker Compose, Basic CI/CD tools, SDLC

IT Professional - Cybersecurity: November – June, 2026, Mon-Fri, 4 hours per day, 6 months

- Cybersecurity Core Concepts
- Computer Networking
- Operating Systems for Penetration Tester
- Fundamental of cloud security & Cryptography
- Ethical Hacking (Red Team)
- Web Application Security follow OWASP Top 10
- Malware Fundamental Development
- Defensive Security (Blue Team)
- Security Development & Automation
- Law, Compliance & Ethics

ADDITIONAL INFORMATION

- **Technical Skills:**
 - Programming: Java, C++, Python, JavaScript, TypeScript
 - Frameworks & Technologies: Spring Boot, React, Next.js, REST APIs
 - Databases: PostgreSQL, MongoDB, Redis
 - Cybersecurity: Web Application Security, API Security Testing, OWASP Top 10, Vulnerability Assessment
 - Tools: Burp Suite, Caido, Ghidra, GDB, Docker, Jenkins, Git, Postman, Keycloak
 - Operating Systems: Linux (Ubuntu, Kali Linux)
- **Languages:**
 - Khmer: Native Language
 - English: Good Writing, Speaking, Listening and Reading
- **Interests:**
 - Researching new technologies
 - Reverse Engineering
 - Application Security and Penetration Testing
 - Software Development
- **ISTAD Certifications:**
 - Pre-University (C++ Programming)
 - Web Development Fundamental
 - Full Stack Web Development
 - IT Professional - Cybersecurity
- **ISTAD Awards/Activities:**
 - Top 3 Student — Web Development Fundamental
 - Top 3 Student — Web Full Stack Development
 - Top 3 Student — IT Professional - Cybersecurity
